[Batzal Roof Designer V1.4.6 Plug](#)

# Batzal Software Roof Designer 2012

## Face Constraints

Setting faces to descend to a specific direction with a specific slope can help you model the roof quickly while keeping all of the faces flat

## Vertex Constraints

Roof Designer allows you to set vertices height while keeping their faces flat

## Automatic UV Mapping

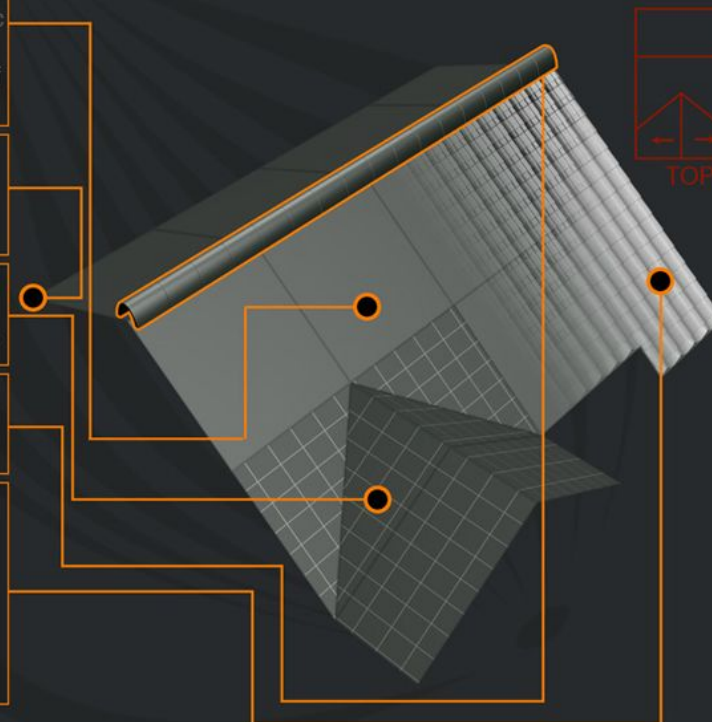

The roof is textured evenly according to several parameters

## Mesh Edge Covers

Edges can be covered with mesh elements

## Mesh Shingles

The roof can be covered with mesh shingles of several premade types and even your own custom types. Random material IDs make your renderings even more realistic
